

Features of Refer & earn APP

Description: - The app is for the end user to gain bonus points by referring it to other users who are not a client in store. It will work as the first user refers the app to other user and other user registers using 1st's referrer code. And when the 2nd user purchases from the store of above a certain value the first user will get bonus points assigned to his account. Then the 1st user can use those points while making a purchase at the store.

Working Process:

The process will be simple, We will make use of your API And link the users account and purchase done in your erp with our app via web panel.

- ★ whenever a new user registered through the app a user account will be created in your erp.
- ★ When the new user makes his 1st purchase the one who referred him will get bonus points.
- ★ And when the user with bonus points makes a purchase. TO reflect his bonus points in your erp we have 2 options
 1. We will Provide you with our api you have to tell your developer to link the api to your panel
 2. We will provide you with an option in our web panel to deduct points from users' accounts manually.

Birthday/Anniversary Wish : -

We will provide you with a feature in the panel to auto send birthday and anniversary wishes to the user and there will also be a panel to send an offer notification with an image to the client.

- When our panel send a wish to the user he will confirm his current address
- saying that there is a surprise gift waiting for you.
- When the user confirms the address then the shop owner will get notification on telegram and get a text message with details.

Bundled Package: -
